PROFESSIONAL SUMMARY

A motivated Information Technology graduate with hands-on academic experience in web development, mobile application development, and data visualization. Skilled in Laravel, PHP, Flutter, and SQL with knowledge of MVC architecture, object-oriented programming, and version control practices. Familiar with REST API development and agile principles. Eager to apply skills in real-world projects and grow as a developer in a professional environment.

EDUCATION

Systems Plus Computer College

Bachelor of Science in Information Technology

Caloocan City

June 2022 - May 2026

- Relevant Coursework: *Web Development, Database Management, Data Visualization, Mobile Application Development*

Arellano University - Elisa Esquerro Campus

Science, Technology, Engineering and Mathematics (STEM)

Malabon City

June 2020 - May 2022

- *Graduated with Highest Honors*

SKILLS

Technical Skills

Laravel • PHP • SQL • XAMPP • Flutter • Dart • Git • GitHub • JIRA • Snowflake • Power BI • Excel • Canva • Figma • Microsoft Office • Google Workspace • REST API • MVC Architecture • Object-Oriented Programming • Responsive Design • Agile Development • Version Control • Claude Code • VS Code • Antigravity • chatgpt

Core Competencies

Problem-Solving • Attention to Detail • Adaptability • Time Management • Effective Communication • Multitasking • Eager to Learn • Takes Initiative

PROJECTS & EXPERIENCE

MoneySense — Capstone Project | Flutter • Dart • YOLOv8 • ResNet-18 • ML Kit OCR

Developed an accessibility-focused mobile application enabling visually impaired users to identify and verify Philippine banknotes using machine learning.

- Implemented YOLOv8-Nano, ResNet-18, and ML Kit OCR for real-time banknote detection and verification
- Built accessibility features including Text-to-Speech, haptic feedback, and voice commands
- Managed state using Riverpod and navigation using go_router

Attendance System with RFID | Laravel • PHP • XAMPP • RFID

Built a web-based attendance monitoring system integrated with RFID technology for automated and accurate record tracking.

- Developed a single admin panel for real-time attendance monitoring and report generation
- Implemented RFID-based check-in eliminating manual attendance tracking

E-Commerce Website | Laravel • PHP • XAMPP • SQL

Developed a full-stack e-commerce platform following MVC architecture supporting complete online sales operations.

- Built product listing, shopping cart, and order tracking features with responsive design
- Implemented user authentication and admin panel for managing products and orders

Inventory Management System | Laravel • PHP • XAMPP • SQL

Built a database-driven system following object-oriented programming principles for real-time stock monitoring and inventory control.

- Developed real-time stock monitoring with automated low-stock alerts and reports
- Designed a relational database for structured and scalable inventory management

Gym Monitoring System | Laravel • PHP • XAMPP • SQL

Created a web-based system to streamline gym membership and attendance management processes.

- Developed a membership management system for tracking active and inactive members
- Built an attendance monitoring system for accurate and automated member tracking
- Designed an admin panel for efficient management of membership records and logs

Data Visualization Dashboards | Power BI • Excel

Designed interactive dashboards and visual reports transforming raw data into clear and actionable business insights.

- Built Power BI dashboards with filters, slicers, and KPI cards for dynamic data exploration
- Created Excel reports with pivot tables and charts for clear data presentation

Prototyping & UI Design | Figma • Canva

Produced UI prototypes and visual materials to communicate design concepts and application layouts.

- Designed wireframes, mockups, and interactive prototypes for web and mobile interfaces
- Applied UI/UX design principles to create user-friendly and intuitive layouts

Internship | Department of Transportation — MRT3 Depot Office

January – April 2026

Applied IT knowledge and technical skills in a real-world government environment supporting digital operations and data management.

- Maintained and organized digital records and databases supporting efficient daily operations
