jasminenalda20@gmail.com | Malabon City, Philippines

PROFILE:

Fresh IT graduate with hands-on experience building full-stack web applications using Laravel and PHP, gained through academic projects and self-directed practice. Comfortable working across the development cycle, from database design to frontend implementation, with knowledge of MVC architecture and object-oriented programming. Also experienced in mobile development using Flutter. Continuously improving my skills and eager to grow as a developer in a professional environment.

TECHNICAL SKILLS:

- **Programming Languages & Frameworks:** JavaScript, PHP, Dart, Laravel, Flutter, HTML5, CSS3
- **Databases:** MySQL, SQL, Snowflake, Supabase (PostgreSQL)
- **Development Tools:** VS Code, Git, GitHub, XAMPP
- **Deployment & Hosting:** Vercel
- **Design Tools:** Figma, Framer, Canva
- **AI Tools:** ChatGPT, Claude, Gemini, Antigravity
- **Data & Reporting:** Power BI, Excel
- **Project Management:** JIRA
- **Productivity:** MS Office, Google Workspace

PROJECTS:

MoneySense — Capstone Project | Flutter • Dart • YOLOv8 • ResNet-18 • ML Kit OCR

Developed an accessibility-focused mobile application enabling visually impaired users to identify and verify Philippine banknotes using machine learning.

- Integrated Google ML Kit for real-time image recognition to detect and classify currency
- Designed accessible UI/UX considerations to support visually impaired users
- Recognized with "Best Capstone in Software" honors

E-Commerce Website | Laravel • PHP • XAMPP • SQL

Developed a full-stack e-commerce platform following MVC architecture supporting complete online sales operations.

- Built a full-stack e-commerce web application with integrated PayPal API for secure checkout and payment processing
- Implemented order status updates and payment verification within the payment flow

Inventory Management System | Laravel • PHP • XAMPP • SQL

Built a database-driven system following object-oriented programming principles for real-time stock monitoring and inventory control.

- Developed real-time stock monitoring with automated low-stock alerts and reports
- Designed a relational database for structured and scalable inventory management

Attendance System with RFID | Laravel • PHP • XAMPP • RFID

Built a web-based attendance monitoring system integrated with RFID technology for automated and accurate record tracking.

- Developed a single admin panel for real-time attendance monitoring and report generation
- Implemented RFID-based check-in eliminating manual attendance tracking

EXPERIENCE:

Internship

Department of Transportation — MRT3 Depot Office, Station Division | January - April 2026

- Accurately encoded and maintained station records to support daily operations
- Organized, monitored, and documented operational data across station activities
- Collaborated with government personnel in a professional office environment

Student Assistant

Systems Plus Computer College - Caloocan | January - June 2025

- Delivered administrative and clerical support to faculty and staff using MS Office and Google Workspace
- Managed, encoded, and filed academic documents ensuring accurate organization

EDUCATION:

Systems Plus Computer College - Caloocan | Bachelor of Science in Information Technology

Graduated: May 2026 | Honors: Best Capstone in Software

LANGUAGE:

English & Tagalog
